

WHAW IN SERBIA

This year our Association (Asociation for Classic Homeopathy «Hahnemann») organized a great number of activities across the Serbian media. This topic in general as well as the topic of allergies treated by homeopathy was covered in various media: the radio, the television, the press, web portals etc. There were numerous appearances in popular television shows in Serbia announcing lectures on the topic: “Allergies and homeopathy”, organized by our Association. The lectures, given by our prominent homeopathic practitioners, had the highest attendance so far.

Furthermore, our Association organized a humanitarian initiative in which registered homeopathic practitioners admitted allergy patients free of charge. Eight registered homeopathic practitioners took part and twenty six patients were admitted in the course of one week. This year recorded the highest number of patients so far.

It can be concluded that WHAW is increasingly successful year after year in Serbia.
